Eighty acres to all who have so served and have received 80 acres.

And if the soldier has deceased without obtaining 160 acres, the same allowance as above is made to his Widow, or if no Widow, to his Minor Children.

Service in the Revolution—in the War of 1812—and in all the Indian Wars, is provided for by said Act

New England Roofing Company,

MANUFACTURERS OF

WARRENS' IMPROVED

Fire and Water Proof Composition Roofs,

Office------7 Liberty Square, Boston.

THIS Company would respectfully solicit the attention of Builders, Architects, Manufacturers, and the Public, to this much approved system of Roofing, which has been very generally adopted in the cities of Buffalo, Cincinnati, Chicago, and St. Louis, and within the past year in Boston and vicinity, where it has given entire satisfaction. It is rapidly superseding the use of all other kinds of Roof, and is confidently offered to the Public, as a mode of Roofing unobjectionable in every important particular.

The materials employed are none of them subject to corrosion or rust, like the metals, nor will they expand and contract with the changes of temperature, like tin and iron, nor shrink in dry weather, and swell in damp, like shingles, and other wood coverings.

It combines in a greater degree than any other Fire Proof Roof now in use, the valuable requisites of cheapness, durability, and security, against both Fire and Water.

These Roofs require an inclination of not more than one inch to the foot, leaving it in good condition for a promenade, for drying purposes, and is of particular advantage to adjoining buildings in the event of fire.

They are afforded at a much less price than any other Fire Proof Roof. The amount of material saved, and which would be used (by the old method) in raising the walls, and framing a steep Roof, still further reduces the cost of the building.

Another advantage gained, is the securing of rooms in the Upper Story, of the same dimensions and quite as commodious, as those in the lower part of the building. The expense of a Three Story building, with this improvement, not being greater than that of a building of two stories with the pitched roof. There is a further saving in the cost of gutters.

These roofs are not affected by the jar of machinery—like those of Tin or Slate.

The Composition is so prepared that it is not affected by the extremes of heat or cold.

In case of injury from any cause whatever, no roof is so easily of cheaply repaired.

Further information obtained by applying at either of the Company's Offices.

MANY important improvements have been made since the beginning of the present century, relieving and facilitating the labor of men by machinery and other modern implements, but few have been nearly neglected until the introduction of the *Patent Self Heating Smoothing Iron*, which will relieve them in a very great degree, from the excessive and fatiguing labor of ironing, besides being a great saving of time and expense. This iron combines economy, convenience, saving of labor and despatch—one cent's worth of dry charcoal supplies fuel for a whole day's constant ironing. Hard wood not from the stove will answer the same purpose. It can be used in any room or in the open air. SPECIAL DISPATCH TO THE WHIG.

Straight-out Whig Convention.

PORTLAND, June 28

The Straight-out Whig Convention to-day was composed of about three hundred and ninety delegates, principally from the large towns

Hon David Bronson, of Gardiner, was chosen President, and the speakers were Hon. George Evans of Portland, —— Cochran of Waldoborough, Abram Sanborn, Esq., of Bangor, and Hon E. Wilder Farley of Newcastle.

Hon. Isaac Reed, of Waldoborough, was nominated by acclamation as the candidate for Governor.

The resolutions are semi squatter-sovereignty, anti Maine Law, anti Know Nothing, and anti-Morrill up to the hub.

Considerable enthusiasm prevailed, and the speakers were exceedingly bitter and vituperative.

Yours, &c.

Democratic Anti-Nebraska Movement.

Upon call of certain Democrats dissatisfied with the endorsement of the Administration and the Nebraska iniquity at the Augusta Convention, a respectable meeting assembled at the Court House last evening. Gen. John Appleton, an old and well-known Democrat, presided, and Charles O. Record, Esq was made Secretary.

The views and feelings of the dissentients from the Augusta platform and candidates were very ably and forcibly set forth by George M. Weston, Esq., in an admirable speech of an hour and a quarter in length, during the delivery of which he was interrupted by frequent bursts of applause.

It will not be expected that we should attempt, at this time, any report of a speech so well and carefully considered, and so pregnant with striking facts, and significant warnings of the fate which awaits the National Democratic party, if its leaders are determined to place it upon the Nebraska platform. We have now neither time nor space to do it—but shall be able to give a very full report hereafter.

It is sufficient to say now, that the views presented by Mr. Weston, and the feelings of hostility expressed in regard to the Augusta platform and nominee, are understood to represent the views and feelings entertained by the minority of the Augusta Convention, and indicated in part by the remarks of Hon. Joseph H. Williams, (a son of Hon. Reuel Williams,) and by those of Hon. Jos M. Morrill, the Democratic leader of the House in 1854. They are express. ve of a firm determination never to be driven into an endorsement of that iniquity, which the Democratic party in the Legislature almost unanimously condemned in 1854, but which they are now called upon to acquiesce in and endorse, at the bidding of the South. And we can tell the Pierce and Douglas leaders who controlled that Convention, that more of the hitherto "old liners," will balk the track on this issue than they are now aware of.

Shall Maine endorse the Nebraska Outrage?

The Democratic platform adopted at Augusta is one of negations—not a single affirmative principle laid down except "endorsement of the administration." As stated by the Democrat of this city, it is "determined and uncompromising hostility to secret, political oath-bound societies, and war to the knife upon the Morrill Administration, and the prohibitory liquor law."

The last item is the only living, active one on the whole platform. The Nebraska perfidy is entirely ignored, or in other words the course of the administration in perpetrating that outrage is silently endorsed. *Not one word did we find in the resolutions in condemnation of the more recent attempts in Kansas itself*, wherein the cause of popular sovereignty have been overthrown, and the freedom of the ballot-box outraged by the armed myrmidons of slavery! Not one word of condemnation has the Democratic State Convention for crying outrages like these—not one word of condemnation against Franklin Pierce, for neglecting and refusing to execute the laws and protect the settlers in Kansas against wrong and outrage. This outrage of the day—as to whether freedom or slavery shall be national, under our republican government and our constitution of equal rights—receives no attention at the hands of the Democratic State Convention. Anti-Know Nothingism and Anti Liquor Law and opposition to Morrill comprise the whole platform, with the exception of a general endorsement of Pierce's administration. And this general endorsement must moreover include an endorsement of the MAIN ACT of his administration—this very Nebraska iniquity. It was so intended by the majority of that convention, and is so understood by the party leaders. "How then," (said one of them in convention,) COULD WE STAND UP IN A NATIONAL PARTY WITH OUR BRETHREN OF THE SOUTH?" Now, will the people of Maine endorse that iniquity also, by electing Samuel Wells for Governor? Will the Whigs of Maine suffer it to be so endorsed, by throwing away their strength on an independent candidate, who cannot by any possibility come within 30,000 votes of an election? Will they become Nebraska Whigs?

CONNECTICUT JUDGES.—Lt. C. Waldo, of Tolland County, Thomas B. Butler, of Fairfield County, John D. Park, of New London County, and O. S. Seymour, of Litchfield County were elected by the House of Representatives on the 25th, as Judges of the newly organized superior Court of Connecticut.

Gems from the Democratic Platform.

How cunningly do the Pierce-ites invite the "Straights" to join them!

Resolved, That it is the crisis in the history of the State, it is incumbent on every true friend of his country (every sincere patriot, and every honorable man) to foil the action of men and parties by (three and not by names) to cast an influence with that party which at all times and circumstances maintained the great principles of civil and religious liberty, the supremacy of the laws of the general government, and the preservation of the Union.

"Come quick! on the wings of love,
Or on the cockney mare"

Guess I will be on the old mare. Money (office) means the mare go.

Look again at the resolution. It calls upon all "true friends" to go with the party which has always maintained "the supremacy of the laws of the *general* government." For what? To enable it to break down the law of a *State* government! Centralization—Federal power is everything—State rights are nothing, and free States nowhere. *Down to Slavery!*

The fifth resolution endorses the National Administration, nearly among other things, of its "resolute maintainance of the old landmarks of the Democratic party." The Missouri Compromise was one of these landmarks, perhaps the greatest. *How has it been maintained?* And yet the Convention says—"*it being understood that this approval of the National Administration is expressive of no opinion in relation to the repeal of the Missouri Compromise.*"

No opinion to express. Had they none? If they had, were they afraid to express it—or ashamed of it? A Democratic Convention ashamed or afraid to speak for liberty—so mean, cowardly and poor-spirited as to be dumb at the bidding of Southern masters? to shut out the light to skulk round with "*dark lanterns*"!

What say Col. Williams and Lot M. Morrill, and independent and honest Democrats generally, to such things? Will they train in such company?

And then, not a word against the outrages in Missouri upon Kansas. This, however, is we suppose, what they resolved in favor of when they said "*by all faithful execution of the laws.*"

THE BOSTON CENTRAL MARKET HOUSE.—This spacious and commodious building, the exterior of which is now nearly completed, we are gratified to learn will be very fully and advantageously occupied at an early day. There are fourteen large stalls on the spacious ground floor, eleven of which have been already rented, as follows:

No. 1. Reed & Sargent—Meats.
" 2. A. H. & R. C. Bird—Confectionary and Fruits.
" 3. Baker & Andrews—Meats.
" 4. Wm Boyd—Butter, Cheese, Eggs, &c.
" 5. Wm. Crowell—Meats
" 6. H. G. Fletcher—Groceries, Cheese, Butter, Eggs, &c.
" 7. Thomas Trickey—Meats.
" 8. Charles Trickey & Brother—Confectionery and Fruit.
" 9. Not let.
" 10. Not let
" 11. Thomas Bickford—(now occupies No. 3) Fish, Oysters, &c.
" 12. Not let
" 13 & 14. H. G. Tuxter—Fruit and Confectionary.

Three of the stalls are now occupied, and are doing a good business—and the remainder will be ready for occupation before the 1st of August. The large public hall in the second story, (which will accommodate an audience of near 2,000 persons) is to be finished by the 1st of October, and will be equal in capacity and convenience, we think, to any thing in the State.

Over the south entrance, is a small but convenient hall, 16 feet by 34, which has been engaged by the Bachelor Organ Society, as a room for worship. It will be thus occupied in October. The building is to be covered, both roof and walls, with Pascataquis slate, of an excellent quality. There is to be an approach to the building from the upper or Franklin Bridge—thus completing a noble and spacious avenue from the lower bridge, through the Custom House and Market House to the upper bridge. If the stream is bridged over upon each side of the building, as it undoubtedly will be, fine stand could be there arranged for country marketmen.

We understand the company will probably realize the first year upwards of $4,000 for amount from the rents of the building, over and above expenses. The whole cost of the building is about $34,000

CONNECTICUT.—An important error was made by the types, in the report of Mr. Bartlett's remarks at the Temperance Convention. He said, "the highest judicial authority had pronounced it *constitutional*"—(*not unconstitutional.*) for legislators to prohibit liquor selling in their respective states. That though Congress might permit the importation of articles, yet each State had a constitutional right to say whether or not their State should be used as a market for those articles, and therefore the idea is false, that since Congress provides for its being brought into the State, it is unconstitutional to prohibit its sale; and on this decision, is founded the law of Prohibition.—*Hartford Journal.*

"Straight" Whiggism.

The following from that old, conservative and cautious Whig paper, the New Hampshire Statesman, is a very valuable opinion for the guidance of the true and honest Whigs of Maine who are *really* Anti-Nebraska men in principle and at heart:

THE "STRAIGHT WHIGS."—Mention was made in the Statesman some weeks ago, that there was soon to be a demonstration by the "Straight" Whigs of Maine. This assertion is about being carried into effect, for on Thursday next they hold a State Convention at Portland. It will be the proper time to speak fully of this movement when the proceedings shall be made known. There is, however, reason to believe that *nothing but mischief will be the product of the convention, if, indeed, it be not originated for the purpose of imparting strength to the Democracy* in the approaching State election. It is a matter of much regret that all those men, calling themselves "Straight" Whigs, but whose sympathies have been with the Democratic party ever since the nomination of Gen. Scott, and who are so straight that they lean over to the other side, do not at once throw off their disguises, and go over to the enemy at a single bound. Then their power for mischief would be gone.

The Republican Convention of Ohio is to meet at Columbus on the 12th of July. It was recently stated by the Cincinnati Gazette (edited by Col. Scheole) that with the exception of one paper in Columbus, and one or two on the Reserve, we know of no disposition on the part of the opposition, to avoid a thorough and complete union."

The election takes place in October.

CONSTITUTIONALITY OF THE MASSACHUSETTS LIQUOR LAW. Benjamin F. Butler Esq., has written the following letter to the editors of the Boston Telegraph:

Lowell, June 25, 1855. I deem it but just to Bayard and the other gentlemen of the profession, to whom the State Temperance Committee submitted a draft of the law concerning the sale of spirituous and intoxicating liquors, which was afterwards proposed to the Legislature, to make public the fact, that *no one of the objections to the constitutionality* of the act of April 20, 1855 which have thus far been specifically stated, either in the opinion of Messrs. Choate, Bartlett, Loring and Merwin, or argued before the Court in Sullivan's case, *arose upon the provisions of the bill submitted by the Temperance Committee* to the Legislature, with the exception of the sections as to the appeal from a judgment of forfeiture, if seized in error, by a Justice of the Peace, and that against bringing liquor into the State for an illegal purpose.

The bill as proposed was printed, and this statement can easily be verified.

Further, in the exception above noted as to appeals from the Justices upon a judgement of forfeiture, both the proposed bill and the law as passed are *precisely the very words of the only law which gave the right of appeal from Justices in civil cases from 1783 to 1786.*

This provision was made one three years after the adoption of the Constitution, by the very men who framed the instrument, and it, as Messrs. Choate and others say, it takes away the right of trial by jury.

Unfortunately that the framers of the Bill of Rights did not better understand the meaning of their own words, and as the constitutionality of the law of 1838 has never been doubted till now, it is doubly unlucky that the people of this state have never enjoyed that for more than fifty years they were unknowingly deprived of the great right of trial by jury" in such criminal cases.

I would humbly advise Messrs. Choate, Bartlett, Loring and Merwin to apply for a joint patent to protect this production of their inventive genius, it is certainly a *new* if not a *useful invention.*

As to the provision against bringing liquor into the state for unlawful purposes, that power has been exercised by this State for more than seventy years in precisely analagous cases, and never been questioned.

A GOOD REASON.—The editor of the Ellsworth American can stand anything but the praise of the Wildcats. He says:

We don't edit a paper to please them, and the very fact that they have occasionally derived aid and comfort from what we have said, is enough to make us suspicious that we are wrong.

We have honestly, and for good reasons opposed the nomination of Morrill; but when we found the Wildcats so rejoiced at what we were doing, we had no heart to go on. We think it may be laid down as a general rule, that when the Wildcats oppose us we are right, and when they hurrah for us we are wrong. Why, we go so far, that if we had a refractory boy who had exhausted all our patience, and we had concluded to "lick him," and a Wildcat should bawl out, "That's right—give it to him!" depend upon it that he would go unflogged.

NOTICE TO MARINERS. Captain James Steele, of the British ship Amazon, reports that on the 4th of November last, while on his passage from Demerara to Liverpool, in latitude 38 50 north, longitude 38 20 west, he passed several large rocks, apparently from two to two and a half fathoms under water. The sea being very smooth at the time, they appeared like the tops of white coral rocks. The water was discolored for a considerable distance, and there was every appearance of several more. Captain Steele sounded immediately after passing, and found no bottom with plenty fathoms. These rocks, he thinks, are not noted in any chart.

SECOND DAY.

The following are the proceedings of the second day as furnished by the Portland Advertiser of the 28th:

The attendance at the services on the second day was very numerous, exceeding by far, the comfortable capacity of the church.

The sermon was preached by the Rev. S. C. Fessenden, after which, the Treasurer of the Maine Missionary Society, Jonathan Howe, Esq., then made his annual report, in which it was shown that the cash on hand

June 24, 1854, was	$1559 21
Receipts for the year,	15,818 09
Total Receipts,	17,437 30
Payments for the year,	15,016 47
Balance on hand,	$2,420 83

A report in relation to the condition of the Theological Seminary was also made, showing the institution to be in a very flourishing condition.

In the afternoon a very animated discussion was had upon Temperance. The Rev. Mr. Thurston of Searsport made a telling speech, and a resolution fully endorsing the "Maine Law" was passed unanimously.

We find the following in the Atlas. It seems to have been penned by authority, and may, perhaps, be regarded as the reply to General Wilson to the insolent letter of Mr. Bowlin.

Boston Journal.

"We have reason to believe that the speech of General Wilson to one the Eleventh Ward Lodge, last week, has been grossly misreported, and that he did not say that in the Know-Nothing National Convention it was the sense of one of the Massachusetts delegation to avoid the question of slavery." Such a statement would have been simply untrue, and, if made, could have been refuted by the united testimony of all of Gen. Wilson's colleagues. Gen. W. did say that the delegates from Pennsylvania and New Jersey, and other Northern States, were willing to ignore the slavery question altogether; and that the South resisted this non-committal policy quite as strongly as it did the Massachusetts ultimatum. Indeed, the moderate proposition of Kenneth Rayner himself met with no better treatment. In fact, all the delegates, except those from Massachusetts, were desirous of a definite expression of opinion upon one side or the other."

THE OPENING OF THE SAULT CANAL. We have received an official account of a public meeting which was held on the 23d inst., on board the steamer Illinois during her passage through the new ship canal around the falls of Sault St. Marie. She was the first boat through.

State Temperance Convention.

The following is a report of the remarks and statements made at the State Convention on Wednesday afternoon, by City Marshal Weaver.

Mr. WEAVER took the floor, as the hour had been assigned to him, and proceeded to give an experience of the workings of the law since he had acted as Marshal of the city, and what had been done by the police department.—When he entered upon the duties of his office, he went, in company with the Mayor, to all the hotels, apothecary shops, and saloons, and asked them courteously to aid in sustaining the law, by refraining from selling. And he believed every public house worthy of being licensed, had complied—and sold no liquor since. Some places not licensed, he was suspicious of. Our apothecaries complied with the request, and he believed they had not violated their pledge. The saloons also abandoned the sale. Nearly all now engaged in the traffic are Irish, though we have many worthy temperance men in this class of citizens. The traffic is confined to the lowest and most degraded—and this is analogous to the movements of all reforms—the evil descending gradually in the scale of respectability, till it rests in the depths of degradation. He then proceeded to give statistics of his doings. Within the last ninety days he had served 113 search warrants. Liquor was seized in 105 of the places searched, to the amount of about 3,000 gallons, about half of which had been consumed and destroyed, and most of the rest no doubt would be. Twenty-seven had been convicted of selling—9 or 10 of whom are now in the Jail or House of Correction. One hundred and five persons had been arrested for having liquors for sale, 80 had been convicted before Police and Justice's Courts, but most of them had appealed to the Municipal and Supreme Courts, to be held in August and September—but himself and other officers being witnesses, there would be no want of testimony. $2,500 had been imposed in fines and costs, of this $400 had been already collected

There had been only about half as many commitments to the Jail-house as during the same months last year, and he did not think there was one twenty fifth as much drunk as at the same time last year.

It is with the greatest difficulty that liquor can be obtained, and that difficulty is increasing. It would be exceedingly dry times after the August and September terms of Courts—There are now employed four policemen by day, and six watchmen by night, besides constables, but if all the grog-shops on Exchange and Union streets and other places in the city could be abolished, he could alone perform all the police duty by day, and one able duty also and two men could take care of the city by night. Four years ago he ventured the opinion on the same floor that the penalty for selling should be imprisonment for the first offence, and he was thought too fanatical.

The best thing that could be done with those who will persist in selling, would be to shut them up, not only as a mercy to them, but a mercy to the community. Those moral considerations which ordinarily influence men to voluntary well doing have no influence over this class of persons. Nothing but the strong arm of the law will save the community from their influences

He then proceeded to speak of some of the schemes which were resorted to to get liquors into the city. At first, it came in repeated persons and bogus agents in country towns, but has ceased of the whole. Then it came in kegs packed in flour barrels, but he was flour inspector this year. Then sugar boxes and dry goods boxes were resorted to, but he and his posse were a shaking 6 minutes, also, and when these boxes would whipper, he took them into his possession. And then came trunks, valises, and mail sacks, in any quantity, usually it came in pork barrels and casks. He had found in the small casks, where it had been carried down through the fore-hold into the hold, and along the keelson past the machinery, and deposited, in dampness, kegs, &c. It was thrown overboard between Boston and Hingham, and picked up by the boats watching for it. But the most that came into the city was put aboard in vessels, and is taken away by night in barrels. Such are specimens of the tricks he had to contend with.

He had had no sympathy on the corner in Boston. He would not say all, but nearly all the officers and men belonging to the wharves opposed to them. But on the Penobscot and the Daniel Webster, it was different. He advised the convention to patronize those in preference to the Boston.

He next commented on the statements made in the Bangor Journal, and pronounced them entirely false in some instances, and greatly exaggerated in others. He denied having damaged goods by breaking open boxes, trunks, &c. Not 25 cents' worth of damage had ever been committed by himself or his deputies, and he called for proof to the contrary. The Journal had been called upon to prove its statements, and was dumb. No instrument had ever been used by them for boring. When boxes were to be opened, they had instruments for doing it without injury to box or goods. No trunks had yet been opened by them in which the "scriter" was not found. And in regard to the sofa, which is alleged to have been spoiled, by boring four holes into the box which contained it, he denied such damage to have been done by himself or deputies, and the owner was understood to say that it had probably been done by the runners to make capital out of.

Of late, the editor of the Journal had become very pious, and had much to say of Marshal Weaver's posse marauding from one end of the city to the other on Sunday, searching for contraband liquors. He would say that Sunday was a leisure day, and more liquor was sold and drank on that day than any two week days.—In Pennsylvania and New York they had laws prohibiting the sale of liquor on Sunday, but they might on week days, the Journal would reverse the rule. Last Sunday he entered a place that had been suspected, but they could not catch them, although they dug up fifteen gallons in the cellar. He thought it right to do good on the Sabbath day."

The law would continue to be enforced, and he should not be intimidated by any array of force or influence. His equanimity had never been disturbed by the assertions of the Journal, or the assaults of any other enemy. The authorities would not relax their efforts, till every grogshop was abolished.

The results of experience are before us. They afford a bright hope for the future. Judging by the past, we have reason to hope the work will go on to its final completion. He did not see how the traffickers in this city could possibly escape. Most of them were already in the meshes of the law, and when their cases are tried under their appeal, they cannot escape being locked up. He thought 90 days would remove nearly all now engaged in it in this city. For himself he was in this work to the end of the war.

Let us, Ladies and Gentlemen, be united, firm, judicious, skillful and persevering, and the work will be accomplished.

STEAMBOAT DISASTER ON THE ST. JOHN. We learn from Capt. Watson, of Salem, Mass., who was on board the steamer Swindaer, bound from Fredericton to Woodstock, on Monday morning last, that the steamer Beveridge, Capt. Dugan, bound the same way and very near, burst her boiler and tore all to pieces forward of the paddle beams, and the stern sunk in about six feet of water. The captain was thrown up twelve rods, and struck the water near the shore. Two other bodies were thought to have been blown into the river. The boiler head, weighing more than a thousand pounds, was thrown on shore. The captain was taken up senseless, and it was thought he could not survive during the day. It is supposed the firemen were killed. It is said that the engineer was a Mr. Morse, who belonged in this city. There were very few passengers on board. Our informant thinks the boats were racing. The explosion occurred only a few minutes after the boats started.—*Journal*

Piracy in the Mediterranean.

If the following account be true, there would seem to be a necessity for Brother Jonathan to take the pirates of the Barbary coast under his hand, as they are flourishing famously under the very nose of John Bull at Gibraltar.

From the Liverpool Shipping Gazette of June 1.

In our impression on Thursday last we briefly reported the loss of the Conference, Peters, of and from North Shields to Carthagena. The following particulars are furnished by Captain Peters, in a letter dated Gibraltar, May —

"The Conference was taken by pirates on the 1st May, off the coast of Barbary. We left the Downs on the 17th April, after a tedious run down the Channel we took our departure from the Lizard Light on the 20th, rounded Cape Finisterre on the 28th, and on the 30th April we passed Europa light, with a strong westerly breeze, and every appearance of a good long voyage

"At 6 P. M. the same day it became calm and continued all night, and at six in the morning of the 2d May we were between 30 and 40 miles to the westward of Cape Tres Forcas, and about 15 miles off the land. I observed two boats, which I supposed might be fishermen. Soon after I observed three more boats put out from a creek or river, the two first left to join their mates until the others joined company, when they came in the direction of our ship which was still lying nearly becalmed. I never suspected that they were armed pirates until they continued so long rowing in the same direction. On their coming near to us I observed the boats to be very large, and crowded with men—I then heartily wished for a breeze. When at about a quarter of a mile distance they opened a tremendous fire upon us, apparently with very large swivel guns. It was then thought high time to save our lives, if possible, accordingly the boat was in a few minutes launched over the side.

"The crew being all fresh and young men, with the exception of the cook, who left the battery and broke one of the ribs, soon gained the boat, which I manned to the north east, leadership between us and the pirates. The pirates kept pulling hard towards the ship, and continued a constant fire on our boat. The boat kept the chase, and when about one or six hundred yards from us I gave my pistol, after giving the signal which was heard at a great length from the boat. The shouts of the ruffians when they found they were taken by surprise upon us were most hideous. After getting clear of them we hove to on our side, in order that I might observe their movements. As soon as they got on board the Conference the boom was put up, and they headed for the land. We waited long as it was prudent to do so. The crew could not be less than 200 men in the pirate.

"We then remained laying on the open sea, without any kind of food or water, and not a breath of wind upon us. We had not but a wooden steering compass and a pocket log. The pirates would probably take everything out of our ship that was useful to them, and then scuttle her, because it being, as about ninety miles from Gibraltar they would expect a man-of-war to be down, let alone our, but unfortunately our long passage gave them ample opportunity to carry their views into effect. At five we had come about two hours to the N. E. We got sight of land bearing about north east, the ship was immediately double-manned, and a long stern chase put on.

"At 11 A. M. we got up with the [illegible] and we were, as we thought, safe from our being taken on board. We had at least a small supply of [illegible] which had made up our minds to starve rather than be taken. When we got alongside we found [illegible] to take their appearance, and we were [illegible] and not a ship [illegible] observed a boat following in the rear. This struck me that it might be the crew of the ship we had boarded. I then [illegible] and hoisted it at the peak end, in hopes they might be seen by them, and, if they saw the saw, they might return to their ship. At night of the boat's return, after the [illegible] time a light on from the land. We [illegible] sound of the pumps and found [illegible] of water in the well. I then took command of her, trimmed the yards, and put the vessel's head to the northward

"There were at the time a barkentine and a hooker on our lee-bow, dis and about [illegible] miles. It struck me the crew might have [illegible] our boat and mistaken us for pirates, as [illegible] might have got on board the [illegible] could be the cause of them leaving [illegible] we could not imagine, but perhaps [illegible] seen the smoke from the pirates [illegible] when they were firing at us—it being the [illegible] the smoke from the firearms would assume a great height. From the papers on board we found the vessel to be the Lively, of Stockton, James Napier, master. We arrived at Gibraltar on the 13th, with the loss of a topmast. Immediately on arrival I applied to the Admiral of the port to indulge him to send a man-of-war to recover, if possible, the Conference, but [illegible] me he could not do so, for two reasons, first, he had only one war steamer, and it was impossible to spare her; and in the second place, if he had been able to comply with my request, it would be of no use, as such a length of time had elapsed since our ship fell into the hands of the pirates. I therefore must, I suppose, conclude that our ship is totally lost.

ANECDOTE ARCHBISHOP.—A friend of mine (says Mr Lambert, in his 'Travels,') was once present at the house of a French lady in Canada, when a violent thunder storm came on and—The shutters were immediately closed and the room darkened. The lady of the house, not willing to leave the safety of her company to chance, began to search her closet for the bottle of *holy water*, which by a sudden flash of lightning, she fortunately found. The bottle was uncorked, and its contents immediately sprinkled over the ladies and gentlemen. It was a most dreadful storm, and lasted considerable time; she therefore redoubled her sprinklings and benedictions at every clap of thunder or flash of lightning. At length the storm abated and the parties were providentially saved from its effects, which the good lady attributed solely to the precious water. But when the shutters were opened, and the light admitted, the company found, to the destruction of their white gowns and muslin handkerchiefs, that coats, waistcoats, and pantaloons, that instead of holy water, the pious lady had sprinkled them with ink.

This is a good season for trimming trees, and the best time to wash apple trees with ley—This ley is made of potash—1 lb. to one gallon of water. If the potash is good, the ley will be strong enough to make soap, or to bear up a hen's egg to the surface.

Good ashes put into soft water answers the same purpose. Some farmers prefer to use ashes and to plaster them on to their trees. When this work is well done it will keep the borers away. Borers are killed by contact with lye of this strength.

The horse fly, be it remembered, lays her eggs very punctually at the root of the apple tree and quince bush about the first of July—but a wash in June always tends to keep the pest away from all hoe and moss, we again recommend it to all orchardists who value their apple trees and quince bushes.—*Mass. Ploughman.*

DR. J. H. SCHENCK'S PULMONIC SYRUP,

For the Cure of Consumption.

THE proprietor of this medicine was himself, many years ago, reduced so low as to be given up by his physicians and friends, in the last stage of Consumption. When all hopes of ever getting well had fled, he was strongly recommended to use a Syrup made from an old Indian receipt, which succeeded in effectually curing him. The family physicians and a large number of respectable gentlemen certify to the facts of this case, and soon the Pulmonic Syrup obtained a reputation never equalled in that section of the country. Speaking, as this case did, a sensation second to that only of a miracle, Dr. Schenck was waited upon by many similarly afflicted, which he admitted that the syrup with the same beneficial results. In fact such was the authority of this medicine, that eminent physicians had their attention drawn toward the rising reputation of it, from having witnessed its curative powers, and freely extended the hand of friendship and encouragement to Dr. Schenck, and introduced the medicine to the public in their daily practice.

No other medicine operates upon the system so as to manifest that the Pulmonic Syrup does. It produces a healthy action upon the morbid parts, purifying them from disease; it promotes the expectoration, and loosens the cough, ripens the matter in the lungs, and when it is discharged, it heals the ulcerating tubercles or tubercles, and the lungs become sound and resume the performance of their natural functions. It also soothes the irritated portion of the lungs and other organs, and thus restores these parts to health. A superior property the medicine possesses over all others is that it contains no opium, calomel, or any other deleterious medicine

In 1841 Dr Schenck removed from Flemington New Jersey, to Philadelphia, and commenced the practice of his profession, where he soon acquired a reputation as skilled by none, in curing a disease that all hitherto had been deemed incurable, and he has since then daily presented to the world incontestible evidence of its success

Both of him parents died with Consumption, which appears to have been an hereditary disease with his father's family. All his brothers and sisters except one, died early of that disease, none of them, but the one brother, reaching the age of twenty

Thus left nearly the last of his family, he naturally felt some alarm, as one after another were consigned to the silent tomb by the fell destroyer

VOLUNTARY TESTIMONY.

We, the subscribers, residents of Flemingtown, do hereby certify that we are well acquainted with Dr J H Schenck. He was attacked by disease, which, as we believe, terminated in Pulmonary Consumption, under the operation of which he was reduced so low as to be unable to leave his bed for a long time, and in all appearance was past recovery. He is now perfectly well—his cough and fever have left him, and we feel justified in declaring it as our belief that these salutary effects have resulted from the use of the Pulmonic Syrup.

Radway's Regulators.

The Third Great Medical Discovery of Radway & Co.

ONE REGULATOR is sufficient to regulate the Bowels, Liver and Pancreas, to a healthy discharge of their functions.

Two will insure a pleasant discharge from the Bowels, at a regular period of time every day.

Four to six will purge thoroughly all corrupt and acrimonious humors from the alimentary canal

Important to Pill Takers.

Every one who is in the habit of taking pills will find RADWAY'S REGULATOR the most pleasant, safe and effectual regulator of the Bowels, Liver, Pancreas, and the most *certain Purifier of the Blood* in use

One of *Radway's Regulators* is superior, in point of medical strength and efficacy, to six of the most popular and best approved cathartic pills.

Radway's Regulator

Radway's Regulators are most carefully prepared from extracts and gums of trees, plants, roots and herbs. There are no pills in use that will act upon the Liver, Pancreas, Bowels, the Salivary Glands and Nerves, so pleasantly and effectually as the R. R. REGULATORS. No pills can be taken for any length of time with the same safety to the constitution, for, instead of debilitating the system by powerful and drastic purging, they act pleasantly upon the bowels, and impart strength to every nerve and tissue of the body.

Regulators vs. Pills.

We are continually asked, What is the difference between Radway's Regulators and ordinary pills?

We answer but pills, as they are ordinarily prepared and sold by different manufacturers, are generally of two kind—those which operate on the bowels merely, called purgative pills, and those which excite the secretion of the liver, and are called mercurial or liver pills. Radway's Regulators resemble pills merely in shape, but differ in every other characteristic. They act not only on the bowels, but on the liver, skin, pancreas, and kidneys, regulating each organ to a healthy action. They are not drastic, and never give pain as most purgative pills do they stimulate the liver without endangering the patient with salivation, as mercurial pills do, containing no mercury in their composition, they are harmless when used for a length of time They are taste less, being enveloped in an elegant coating of gum. 1 to 3 regulate, 3 to 6 purge—good at all times.

As a Family Physic

RADWAY'S REGULATORS are the most innocent, safe, mild and pleasant pills in use. They are a quick and certain cure for Costiveness, Indigestion, Liver Complaint, Kidney Complaint, Jaundice, Head Aches, Nervousness, Melancholy, Diseases of the Bladder.

Female Complaints,

Leucorrhea, Floor Albus, Whites and Irregularities of all kinds.

Bilious Diseases,

Bile on the stomach, Bilious Cholic, Enlargement of the Spleen, and all Chronic Affections of the Liver and Kidneys.

R. R. R. REMEDIES are sold by Druggists everywhere.

☞ For great cures performed in a short time by R. R. Relief, see next weeks paper. R.R.R. Remedies act quickly—the moment they were taken or applied their health relieving efficacy is experienced.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparation in extant. The testimony in its favor given by the most prominent and well known Physicians and individuals in all parts of the country is unanimous. The following from your own State is respectfully submitted, referring any who may still doubt, to my "Memorandum," or Practical Receipt Book for Farmers and Families, to be had gratis of all the Agents for the German Bitters

TESTIMONY FROM MAINE

Capt Daniel Ward, of this place, Maine, July 16, 1853, says "I was taken sick one year ago last April, upon my passage from Havana to Charleston, S.C. At the latter place took medicine and procured a physician, but for ten days could obtain no relief, no sleep or appetite. At last taking up a newspaper having your advertisement of "Hoofland's German Bitters" in it, I sent for one immediately. This was about 10 o'clock, at 11 o'clock I took the first dose, and another at 6 o'clock. The effect was so rapid on me that I had a good appetite for supper, and restful well that night, and the next day found me a well man—I have not been without your medicine since, having been sailing between Baltimore, Charleston, and the West India Islands ever since. I have now given up going to sea and reside in this place, where you should hand as agency, as you could sell large quantities of it."

Jos. B. Hall & Co, Presqueisle, Aroostook Co., Maine, April 21, 1853, say "We herewith send you a certificate of a cure performed by the use of *only one bottle* of the German Bitters We think Mr Clark to be a man of veracity, and have no doubt of the truth of his statement.

Messrs. Jos B Hall & Co—Gentlemen—In answer to your inquiries I will state that my daughter, aged about 16 years, has been complaining of a pain in her side for six or seven years, and about the first of January last was taken down and confined to her bed. The pain in her side was very severe, besides being troubled with pains between her shoulders and in her breast. From reading a number of cures performed by "Hoofland's German Bitters, I was induced to try them in her case, and sent to your store and purchased *one bottle*. She had taken it but a few days when she began to improve, and now, after taking *only one* bottle, she is enjoying better health than she has for years—She feels no pain in her side or in any part of her body, and attributes her cure *entirely* to the German Bitters. WILLIAM CLARK.

Salmon Brook, Aroostook Co., Me

You should bear in mind that these Bitters are *entirely vegetable*, thereby possessing advantages over most of the preparations recommended for similar diseases.

A MARVELLOUS REMEDY

For a Marvellous Age!!

HOLLOWAY'S OINTMENT.

The Grand External Remedy.

By the aid of a microscope we see millions of little openings on the surface of our bodies—Through these the Ointment, when rubbed on the skin, is carried to any organ or inward part. Diseases of the Kidneys, Disorders of the Liver, affections of the Heart, inflammation of the Lungs, Asthma, Coughs and Colds, are to its means effectually cured Every housewife knows that salt passes through bone or meat of any thickness—The healing Ointment far more readily penetrates through any bone or fleshy part of the living body, curing the most dangerous inward complaints that cannot be reached by other means.

Erysipelas, Salt Rheum, and Scorbutic Humors.

No remedy has ever done so much for the cure of diseases of the Skin, whatever form they may assume, as this Ointment. No case of Salt Rheum, Scurvy, Sore Head, Scrofula, or Erysipelas, can long withstand its influence The inventor has travelled over many parts of the globe, visiting the principal hospitals, dispensing this Ointment, giving advice as to its application, and has thus been the means of restoring countless numbers to health.

Sore Legs, Sore Breasts, Wounds and Ulcers.

Some of the most scientific surgeons now rely solely on the use of this wonderful Ointment, when having to cope with the worst cases of sores, wounds, ulcers, glandular swellings, and tumors. Professor Holloway has, by command of the Allied Governments, dispatched to the hospitals of the East, large shipments of this Ointment, to be used under the direction of the Medical Staff, in the worst cases of wounds. It will cure any ulcer, glandular swelling, stiffness or contraction of the joints, even of 20 years' standing.

Piles and Fistulas.

These and other similar distressing complaints can be effectually cured if the Ointment be well rubbed in over the parts affected, and by otherwise following the printed directions around each pot.

Both the Ointment and Pills should be used in the following cases

Bunions,	Piles	Sprains
Bolts,	Rheumatism	Scalds
